

Project title: Fantasy Home

This project contains a Home (with one room) which have high definition screen and High technology computer and high technology table. On left side there is shelf with some books and couple of chairs are faced to the big screen. Screen is playing video clip of a **Witcher 3** game and you can hear it. Lighting conditions are set in real-time conditions.

- There is only one scene created. So it will not be hard to find it
- There is not special hardware restriction. Initially the project is built for a google cardboard VR platform. If you want to use with other platforms you can switch the platform and Build and Run
- Test.apk file contains builded apk for android. But it may not run if your targeted platform changed.

Enjoy it.

Thank you
